Preferred solution

Overview Plans Reviews

The insights platform for your blockchain

The Epirus Azure Blockchain Service Explorer is the most complete solution for providing insight into your blockchain deployments on Azure.

It works seamlessly with Azure Blockchain Service, Hyperledger Besu, Quorum and Ethereum blockchain deployments.

Its rich interface provides detailed views for interpreting token, contract, account, transaction, and block data on your ledger.

The clean layout allows users to:

- Obtain business-driven insights into your blockchain applications with its dashboard and powerful API
- Easily gather and track critical transaction data for your tokenized assets.
- Provide transparency of blockchain applications and smart contracts

SaaS and Enterprise Edition

Web3 Labs also provides hosted Blockchain Explorer instances - these can be hosted within your cloud subscription or hosted by us.

Product Overview

The insights platform for your blockchain

The Epirus Blockchain Explorer is the most complete solution for providing insight into your blockchain deployments on AWS.

It works seamlessly with Hyperledger Besu, Quorum and Ethereum blockchain deployments.

Its rich interface provides detailed views for interpreting token, contract, account, transaction, and block data on your ledger.

The clean layout allows users to:

- Obtain business-driven insights into your blockchain applications with its dashboard and powerful API
- Easily gather and track critical transaction data for your tokenized assets.
- Provide transparency of blockchain applications and smart contracts

SaaS and Enterprise Edition

Highlights

- Blockchain Explorer for Hyperledger Besu, Quorum and Ethereum blockchain deployments
- Easy navigation of token and smart contract assets
- Advanced searching, filtering and sorting capabilities
